

Aluminium Materials Lifter

“Action Handling promise safety & security with their Lifting Equipment”

All our Lifters are designed to comply with Health & Safety standard regulations

During a large-scale refurbishment project at London’s Heathrow Airport, workmen onsite were experiencing a difficulty in lifting/manoeuvring materials. Action Handling were engaged to liaise directly with the project Director from a major building contractor. Following a detailed design process, the aim was to supply a solution which would be lightweight, user-friendly, multi-functional and above all safe.

Whilst complying with all standard Health & Safety regulations, the product development team at Action Handling set about designing a Materials Lifter which would have numerous optional accessories.

Specification;

Capacity: 181Kg. Lift height: 3100 mm. Overall stowed size: 724L x 730W x 1715H mm. Weight 186Kg. Counterbalance base.

- This new & improved design will provide many years of reliable service.
- Easy to load into any size pickup vehicle to go wherever needed.
- The lift comes with a counterweight base and Safety-brake winch that automatically locks load in place.
- Legs, forks, platform boom attachments etc. (all removable without tools).
- Reversible forks can be used in two positions for greater versatility.
- Easy to store or transport.
- Durable steel forks.
- Reversible winch handle.
- Winch operates while ladder is stowed or in use.
- Hold down mechanism to secure for transporting.
- Electric winch.
