

Four Fork Attachment

“For Forklift attachments, it has to be Action Handling”

All our forklift attachments are designed to comply with Health & Safety standard regulations

With the London Olympics site focused on completion, all building contractors were keen to ensure cost-effective and efficient equipment was being used at all times. When a specialist Joinery Manufacturer decided there was a requirement for a custom forklift attachment, Action Handling was their first port of call.

The issue was the transportation of various materials, ranging from palletted goods to loose objects. The shape/size of these items prohibited the use of standard Two Fork models. The solution was the bespoke fabrication of a Four Fork Attachment to be used as an accessory to current Forklifts onsite. This would assist positioning of products whilst greatly increasing productivity and Health & Safety compliance due to secure operating procedures.

Four Fork Attachments are designed to handle wide unpalletised loads, such as plastic pipes, timber or sheet steel, safely and helping to reduce the possibility of product damage.

Standard features:

- Zinc plated fork heel pins for safe attachment to truck.
- Polyester powder coated bright orange for safety.

Specification:

- Width 3000mm.
- Pocket length 1200mm.
- Capacity 3000Kg.
- Fork size 150 x 60mm.
