

Pallet Cage with Skid Base

“Action Handling are the leaders in bespoke storage systems”

All our cages are designed to comply with Health & Safety standard regulations

Action Handling Equipment Ltd were engaged by a leading UK Chocolate Manufacturer to design and manufacture a bespoke pallet cage for use onsite at various warehouses/outlets.

Having consulted with onsite personnel, it was identified that most pallet cages would slip and slide during storage and this could prove extremely hazardous, especially when stored above ground. The success of this solution would depend on a specially fabricated Skid Base fitted to the Cage. This would allow the customer to store the units on varying sizes/heights of Pallet Bream Racking.

Health & Safety being a core issue in any environment, Action Handling designed the finished product to ensure that it would nest securely with an anti-slip material to prevent accidents.

Following a successful trial period, the Chocolate Manufacturer now places bulk orders for these Cages for use across the UK in warehouses/outlets and transit of goods alike.

- Constructed to withstand constant use and abrasions.
- Easy to assemble and fold for storage (Patented semi-auto latch for simple assembly).
- Extremely suitable for shipping, transporting and merchandising.
- All standard models are provided with a half drop gate on one side. This increases ease of loading/unloading, especially when multiple cages are stacked.
