

Pedestrian barrier system

“Action Handling is our 1st choice for Health & Safety solutions”

All our equipment is designed to comply with Health & Safety standard regulations

Health & Safety at work demands the highest standards to protect staff and visitors. Therefore, in a busy, noisy and often confusing warehouse environment, it is absolutely essential that employees, visitors, sub-contractors and customers feel safe, and are able to quickly identify the safe area to be in at all times.

When a leading Utilities Contractor had to renew their safety hand-railing at two sites in Hertfordshire and Kent, Action Handling Equipment Ltd were pleased to supply and deliver new steel barriers in a ‘Safety Yellow’ finish. Our barriers are highly visible so that the designated walkways are immediately identified. This assists people to determine which areas they have access to and those they have not.

Hand-railing supplied inside the main warehouse to protect staff along the main walkway; measuring 17m long x 900mm high (left)

Action Handling Equipment Ltd also provide pedestrian barriers for protecting storage areas, machinery and denying access to places that are potentially hazardous and dangerous.

Our industrial barriers are extremely adaptable as they are bespoke and “made-to-order” in-house. They can be designed to suit your exact needs, incorporate access gates if required and be supplied with health and safety signage where appropriate.

Hand-railing supplied outside the main goods-in entrance; measuring; 2000mm long x 900mm high (left)

Please contact our sales team for a consultation and quotation for your own requirements. You can reach us on; 01279 724989 or sales@actionhandling.co.uk
