

## Wheelie Bin and Drum Rotator

*“Action Handling guarantee security & safety with their Bin/Drum Rotators”*

**All our equipment is designed to comply with Health & Safety standard regulations**

Action Handling were contracted by a leading Railway Infrastructure specialist who were looking to increase productivity & efficiency with garbage disposal onsite.

Consulting with the client at Head Office, it was clear that workmen were experiencing difficulty when disposing of garbage/waste or manoeuvring drums using a standard Bin/Drum Rotator. The design for a bespoke Bin/Drum Rotator for use with standard wheelie bins was proposed and consequently manufactured. Following a successful implementation of the bespoke Rotator, Action Handling went on to supply a large quantity and maintains bulk orders. The customer continues usage of the cage during site-work and on other projects.

### Wheelie Bin and Drum Rotator

This drum rotator has a special girdle that allows both to be clamped around the mid points and rotated. It can be rotated either by crank handle or loop chain. It handles 210 litre drums and 120/240 litre wheelie bins. Bin/drum is located in the girdle by a ratchet and webbing strap.

**Capacity:** 360Kg.

**Max fork size:** 140x50mm.

**Drum type:** Wheelie bin.

**Method of operation:** Crank handle.

### Two Wheeled Waste Bins

Manufactured from high quality, high density polyethylene (HDPE) and compliant to EN840, RAL and DIN 30760.

Unique design has produced noise level not exceeding 92dB. Containers are supplied with highly robust rubber 200mm wheels with sturdy axle mountings made from tempered steel.

- Choice of 6 colours: grey, green, brown, yellow, blue or red.
- Resistant to UV, frost, heat and chemicals.
- Cadmium-free and easily recycled.
- Rear handles for ease of movement.

**Capacity:** 240 litres.

**Weight:** 14.15Kg.

**Size:** 1070x580x740mm.

**Max:** 110Kg.
