BASE OPTIONS

The base of your dolly plays a big part. Your dolly may need a plastic base to prevent damage, you may have weight constraints or you may need a mesh base to allow liquids to fall through.

Standard ply base, cut from 18mm treated ply, durable, reliable and kind to your load.

Pressed steel sheet base. Offers more longevity against any other base, powder coated in the same RAL colour chosen for the main frame.

Foamex plastics base, offer a light but robust solution which is kind to the product that you are carrying.

Mesh base, offer a similar durability to the pressed steel side but keep the overall weight of the unit down.

REF	Extra cost for Base Material	PRICE
DL/Ply	Plywood base	£46.74
