Ensures a thorough job is done

FORK LIFT MAGNET SWEEPER

Reduces risk of vehicle punctures and injuries by clearing steel debris like nails and swarf from car parks, factory floors and yards. Quick to mount with quick-release mechanism. Corrosion-resistant for long term reliability in industrial settings.

- 1200mm wide x 76mm deep magnet with 90kg pull force for efficient debris collection.
- Fork spread: 1050mm.
- Secure attachment: Eye bolt safety fasteners ensure stable forklift mounting.
- Lightweight at 14kg, yet robust for industrial and commercial use.
- Fully tested and certificated per the Machinery Directive (2006/42/EC) for safe operation.

MEDIUM DUTY FORKLIFT SWEEPER

Engineered for medium to heavy duty outdoor applications, this robust sweeper features a durable 3mm steel shroud and eight rows of 1800mm-wide, 3mm polypropylene bristles for powerful, thorough cleaning. Perfect for farmyards, construction sites and car parks. Designed with integral lugs for easy retrofitting, it supports optional magnetic bars or swivel hitches for added versatility. With quick 'T' screw clamp attachment to forklifts, it cuts down on manual labour while boosting efficiency and productivity.

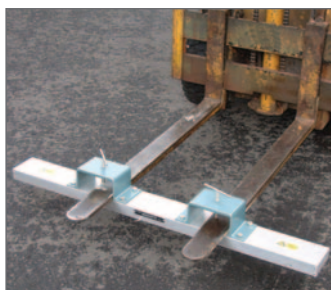

- Efficiently clears sand, snow, gravel and leaves, reducing labor costs.
- Low maintenance with no moving parts, ensuring long-term reliability.
- Fully tested and certificated per the Machinery Directive (2006/42/EC) for safe operation.
- Ideal for farm yards, building sites, factory yards and car parks.
- Broom width: 1800mm.
- Bristle height: 310mm.

MAGNETIC FORKLIFT SWEEPER

Featuring a corrosion-resistant magnet with a 4-5 pickup range, available in three widths, this attachment glides onto forklift forks with 'T' screw retention for secure operation. The non-magnetised cleaning strip allows easy debris removal therefor reducing puncture risks, making it ideal for industrial settings such as car parks, depots and warehouses.

- Quick to mount and remove, enhancing operational efficiency.
- Fully tested and certificated per the Machinery Directive (2006/42/EC) for safe operation.
- Durable construction: Corrosion-resistant design ensures long service life.
- Easy cleaning: Non-magnetised cleaning strip for effortless debris removal.
- Secure attachment: 'T' screw retention ensures safe mounting to forklift forks.
- Max fork size: 180 x 70mm.
- Pocket centres: 650mm.

HEAVY DUTY FORKLIFT SWEEPER

Built for durability and performance, this heavy duty sweeper features a robust 5mm steel shroud and 11 rows of 1800mm wide, 3mm polypropylene bristles for exceptional debris collection. Designed for secure and easy forklift attachment, it comes with 1000mm fork pockets and heel pin retention. Integral lugs allow straightforward retrofitting of a magnetic bar or swivel hitch, while its efficient design helps cut labour costs and boost productivity.

- Broom width: 1800mm.
- Bristle height: 310mm.
- No of rows: 11.
- Fork spread (o/s to o/s): 870mm.
