FORK TRUCK ATTACHMENTS

TWO PERSON RAISED FORKLIFT CAGE

The ideal two person platform for quick, high-level maintenance, repairs, or inspections when forklift mast height is limited. Built from durable, high-visibility steel, it features an elevated 1220mm x 1000mm platform, secure access ladder and a self-closing locking gate for added protection. Full length fork pockets, a heel locking system and anti-slip flooring deliver stability and confidence at any height.

new

Our expert says

Don't take unnecessary risks, access high levels safely

- Secure entry: Self-closing, auto-locking side gate with external ladder ensures safety for two person operations.
- Operator safety: Harness anchorage points and in-board handholds for secure operation.
- Anti-slip flooring: Tread with drain holes prevents water accumulation and slipping risks.
- Protective design: Perforated back mesh and kick rails prevent exposure to hazards and falling tools.
- Stable attachment: Full length fork pockets and heel locking system for secure forklift connection.
- Raised height: 1000mm.
- Length x width: 1220 x 1000mm.
- Max fork spread: 140 x 60mm.

CRANE SLUNG SAFETY CAGE

Perfect for maintenance, inspection and elevated site tasks. This cage is easily suspended from overhead cranes using four-legged lifting chains and overhead safety guards for total stability. Choose from convenient step-through rails or an automatic locking side gate for quick, secure entry. Built to perform in demanding industrial environments, it's your trusted solution for safe, elevated work.

- BS EN 14502 Compliance: Meets regulations for cranes and suspended baskets for lifting persons.
- Secure lifting: Four-legged chains for overhead crane use, positioned safely away from personnel.
- Overhead protection: Robust guard to shield users from falling objects above.
- Fork stirrups: Enable stable forklift transport for cage positioning (no personnel during movement).
