

# STEEL FABRICATION/EQUIPMENT INSPECTIONS

## STEEL FABRICATION

With 50 years of working closely with our clients to provide solutions to their requirements, we have both the knowledge and the facilities to fabricate a wide range of products to exact specification: from fine engineered items through to heavy steel structural work and steel constructions.

- Fabrication work in mild steel, aluminium and stainless steel.
- MIG, TIG and ARC welding.
- CNC facility for machining, turning and milling.
- In-house spray booth for epoxy powder coating or specialist finishing.
- On-site visits to discuss your product designs and technical details.

**QUALITY Guarantee**

## SITE WORK

Our on site capacity is most extensive. We offer the following services:

- Loading docks fabricated and installed.
- Pipework and ducting installations.
- Structural alterations and steelwork erecting.
- Erection of mezzanine floors.
- Office and factory refurbishments.

• Internal staircase

• Integrated offices

• Steel structural work incorporating a mezzanine floor

- Mechanical and electrical installations.
- Internal and external stairways.

• Loading dock installation for the Royal Mail

## EQUIPMENT INSPECTIONS

Don't put your workforce at risk. We have teams of engineers throughout the UK who are trained to carry out on-site inspections of your equipment. Upon inspection, should your equipment require any repairs, we can offer this service at an extra cost.

- Suitable for ladders, safety steps, shelving, racking, pallet trucks, stackers, scissor lifts and all types of other materials handling equipment.
- Nationwide coverage.
- Contact us for prices, quantity discounts for multiple items over 4 products.

Includes first hour of labour. We will contact you regarding any further costs involved for labour beyond one hour. Parts (if needed) are not included. We will contact you regarding the cost.
