

TAPER GRIP DRUM CLAMP ATTACHMENT

- CE marked and plated.
- Suitable for use on 210 litre steel drums.
- The steel jaws grip the rim of the drum, allowing the drums to be picked up or set down without spaces between them.
- Automatic grip lock will not open and ensures safe drum transportation.
- Grip head has different positions to fit different heights.
- Capacity: single 360kg, double 720kg.

REF	No of drums held	Fork spread	Overall size L x W x H mm	Weight kg	PRICE
DLC01Z	1	560mm	830 x 710 x 1000	60	£580.44
DLC02Z	2	605mm	1030 x 850 x 1000	96	£730.19

NB It is important for the safe use of this unit that the drum ring is not damaged and is strong enough to support its own weight.

HEAVY DUTY RIM GRIP DRUM HANDLER ATTACHMENT

The drum handler to choose for handling drums packed tightly together. Steel jaws grip the rim (chimb) of the drum, allowing the drums to be picked up or set down without spaces between them. Ideal for stuffing and destuffing containers and suitable for use on rough terrain. May be used with 120 or 210 litre drums of steel, 'L' ring or 'XL' ring plastic types. A rubber lined clutch support cushions drums during transport. This model is available with a mild steel frame and a zinc plated head as standard, which is suitable for most applications.

REF	Max SWL kg	Size mm	Spread mm	Load centre	C of G	No of drums	Drum types	PRICE
PB-1	750	140 x 50	560	187	570	1	Steel & L ring	£984.20
PB-2	1500	140 x 50	560	187	640	2	plastic	£1505.90

CRANE SLUNG DRUM ROTATOR ATTACHMENT

Rotation is carried out by means of a crank handle (for below shoulder operation), a continuous loop chain (for operation above shoulder height) or by hydraulic motor to replace the handle/chain that is connected to the aux valve on the truck. Supplied without hoses. Fitted with a heavy duty gearbox for precise and controlled pouring.

Designed primarily for sitting under an overload crane for decanting the contents of 210 litre steel drums or 210 litre 'L' and 'XL' plastic drums. Drums are retained in the attachment by two webbing harnesses and ratchets to avoid slippage.

Our expert says

Have precise control over pouring

REF	Max SWL kg	Max fork size mm	Method of operation	Drum types	Weight kg	PRICE
DTR-3-DS	360	140 x 50	Crank handle	Steel & L ring	92	£1676.10
DTR-4-DS	360	140 x 50	Loop chain	L ring	94	£1888.48

FORK MOUNTED DRUM ROTATOR

The fork mounted drum rotator is the perfect solution for handling 210 litre steel and L/XL plastic drums across manufacturing, warehousing and chemical processing environments. It features a premium gearbox with your choice of crank handle or loop chain rotation, offering smooth, controlled pouring and emptying every time. A heavy duty braced girdle, fitted with twin webbing and ratchet straps, ensures secure drum gripping and excellent stability during operation. Large 'T' screws and oversized fork pockets deliver a quick, firm fit to forklift forks, ensuring maximum safety and reliability.

- Eliminates manual handling, reducing back strain and spill risks.
- Ensures precise, controlled pouring to minimise content loss.
- Fully tested and certificated per the Machinery Directive (2006/42/EC) for reliable performance.
