

DRUM/IBC BUNDED STORES WITH PUSH BACK LOADING

The same high specification of engineering used on our standard banded stores but also fitted with push back loading shelves. Push back loading is a simple way of gaining access to pallets without the need for extended forks or up rated fork lift trucks. A 'sliding rail device' allows the pallet to be pushed to the back of the unit. The front pallet controls the movement of the back one.

**Comes with
20 YEAR
structure
guarantee**

- All units have: removable galvanised sump grid mesh, 'support beam' shelves, lockable sliding doors, crane lifting points, sloping roofs with a rain channel and base plinths to eliminate ground contact with the sump. Grid mesh available for shelving at additional cost.
- Base construction 3mm sheet steel with RHS supports and pressed ribs. 2mm sheet steel back, sides and doors, corrugated where required.
- Vents can be supplied as an optional extra.
- All sumps are fully compliant with current UK regulations.
- On-site fork lift or crane will be required for unloading delivery.
- Please contact us for prices.

Push back loading

AHEDPU9624PB	8840 x 2800 x 3660	96 or 24	6100	4400	POA

AHECBS1
A 6m long unit with a 16 x 205 ltr vertical drum store built in to one end with the remaining space (approx 4.5m) a fully contained work area with 3 sets of shelves.

DRUM/IBC BUNDED COMBINATION STORES

Our fully enclosed and secure combination stores allow the safe storage of your liquids, drums and IBCs whilst also providing a secure work area within the unit. One end of the stores is fitted with lockable sliding doors giving access to a shelved area for up to 16/32 205 ltr drums and up to 4 IBC pallets. The walk-in compartment is accessed via a hinged door to the side and has shelving for small containers and equipment.

- These units can be customised to suit your specific needs. For example the sump can be compartmentalised for the safe storage of incompatible liquids. The internal layout can also be bespoke designed with partitions or fire rated dividers.
- External size: 6000L x 3000W x 3325H mm.
- Sump capacity: 4500 ltr.
- Tare weight: 3000kg.
- Please contact us for prices.
