

PALLET DISC TURNTABLE

Principally designed so a pallet truck can position a pallet on or off of the turntable. The load can easily be rotated by fingertip control thus eliminating the need to stretch. Less back stretch improves work efficiency and reduces the risk of injury. 360° rotation with access for a pallet truck by a built in shallow ramp. Ideal for use in restricted spaces, on mezzanine floors, narrow aisles, hygienic areas, food and pharmaceutical industries. Locking device prevents accidental rotation.

REF	Turntable O/H	Diameter	Capacity	PRICE
PLD1100	22mm	1100mm	2000kg	£1258.50

PALLET RING TURNTABLE

Simple and lightweight tool to revolve pallets.

- Strong steel design which does not tighten or bend under load.
- Free turning.
- Capacity: 2000kg.
- O/S dia x H: 1016 x 60mm.
- Inner dia: 960mm.

REF	PRICE
PLR1016	£429.00

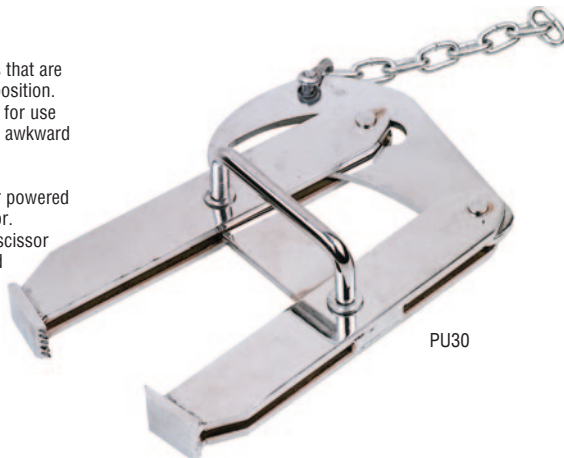

PALLET PULLER

A range of three pallet pullers that are designed to pull pallets into position. They are particularly effective for use on the backs of vehicles or in awkward warehouse spaces.

- Simply attach to a forklift or powered truck and pull along the floor.
- There is a single or double scissor model along with a cammed mechanical model: PU30.

PU10

PU30
