

**Our expert says**

Superbly made yet great value

## HAND CHAIN HOISTS

A compact lightweight design. Despite the weight saving, it has excellent working stability.

- Chrome-plated housing for corrosion protection.
- Easily accessible chain mounting.
- Grade 8 load chain used on all hoists except 10 tonne - 3 chain falls which is grade 10.
- Chain conforms to DIN |EN 818-7-T Standard (RUD supply).
- Overload protection as standard at 500kg and above.
- Hoist up to 3 tonnes on a single chain fall.
- Standard hoist with 3m lift, other heights on request.

**Our expert says**

Quality engineering with a smooth lift

- These prices are based on a 3m lift/operational length 2.5m. Please contact us for prices on models with up to 14m lift.

Push travel trolley

Push travel trolley with locking device

Geared trolley

## GIRDER TROLLEYS

A range of girder trolleys: push trolley, push trolley with locking device and a chain operated geared trolley.

- Capacities: 1000kg - 10000kg.
- Forged steel side plates.
- Safe working loads at FOS 4:1.
- Finish colour RAL5005.
- Adjustable for varying beam size.

## BEAM CLAMPS

- Simple and safe load attachment tool for hand or electric hoists.
- Easy two-step operation for urgent tasks and assembly jobs.
- Can also be used for the lifting and transfer of steel beams and as a pulling clamp.
- Suitable for attachment to horizontal beams or up to 5° from horizontal.
- Fits a wide range of beam widths.
- Easily fixed using thread handle.

**Our expert says**

Handy tool to attach chain hoists to RSJ beams
