DESIGNING YOUR CONVEYOR

ROLLER PITCH

The load must be in contact with at least 3 rollers at all times. Loads without a rigid base should be supported on a flat tray. Maximum frame capacity should not exceed 1000kg over 1000mm track length.

STANDS

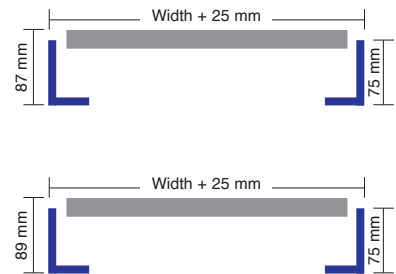

Heavy duty stands are manufactured from welded angle. The maximum distance between stands should not exceed 1500mm. The stands are ordered separately. Stands should always be positioned where tracks are joined. Each leg is fitted with a screw foot to give +/- 25mm adjustment. Please state conveyor width and actual stand height when ordering.
