

## HAND HYDRAULIC STAINLESS STEEL STACKER

Optimum hygiene with the stainless steel stacker. The risk of bacterial contamination is minimised. The stainless steel products are developed for environments where severe hygiene is needed on the surfaces that are in direct contact with the goods being handled eg meat, fish or medicine.

- Central location of all control buttons on the handle.
- Transparent and impact resistant safety screen on the mast.
- Location of parking brake.
- Closed forks mean easy cleaning and few hiding places for bacteria.

## SEMI ELECTRIC STAINLESS STEEL STACKER

The semi electric version gives electric lift operation and easy to move push/pull movement control. Designed for severe hygiene areas where bacterial control needs to be minimised. The design focuses on the safety and ergonomic working conditions of the user. As an example, the ergonomically correct handle ensures the user a relaxed hold.

- Central location of all control buttons on the handle.
- Transparent and impact resistant safety screen on the mast.
- Location of parking brake.

## FULLY POWERED STAINLESS STEEL STACKER

The fully powered stacker is ideal for wet, aggressive and hygiene areas in the food and pharmaceutical industries. Goods can be moved in very confined areas with temperatures down to -30°.

- Ingress protection, IP54.
- Strong and solid construction.
- Steel type EN1.4301.
- Highly manoeuvrable.
- Optimum utilisation of the space.
- Operating down to -30°.
- Initial lifting is optional.
- All electronic parts and the motor have watertight casings.
- Straddle wheel arm versions are also available.
