SEMI STAINLESS STEEL SKIPS

Regular range of Roll Forward Skips with steel underframe, but fitted with a body manufactured from stainless steel. Its corrosion resistance makes it ideal for handling wet or corrosive products or for use in a harsh environment. Fitted with safety retaining chain. Body construction - 3mm. Max fork section 150mm x 65mm.

FULLY STAINLESS STEEL SKIPS

This fully stainless steel skip is designed for use primarily in the food and drinks industry where corrosion resistance and the minimisation of contamination is vital. Every part is manufactured from stainless steel, making it suitable for pressure washing or steam cleaning. Construction in 3mm stainless steel. Fitted with safety retaining chain. Max fork section 150 x 65mm.
