

PALLET RACKING

Our standard pallet racking system is a fully adjustable and very cost effective way of storing pallets. We offer a large range of sizes and load capacities to suit most warehouse and distribution applications. We also offer customised heights, lengths and layouts, complete with a wide range of accessories.

- Provides direct access to each pallet with any forklift.
- Adjustable beams at 50mm increments.
- Two standard depths for UK (900mm) and Euro (1100mm) pallets.
- Frame assembly service available for even quicker installation. Please call for a quote.

• All styles of pallet racking systems are available. Please contact us.

PALLET RACKING FRAMES

Complete frames sold with base plates and floor fixings. Shims sold separately. Free support design service.
