Reduce fire risk from lithium batteries

BATTERY CHARGING CUPBOARDS

BATTERY CHARGING CUPBOARD

The fastest growing fire risk in the UK is from charging lithium batteries. This unit offers the safe charging of multiple batteries in one mobile cupboard. Designed for indoor and outdoor use with IP55 rating. In the event of a fire the unit activates visual and audible alarms while sending notifications to a designated mobile phone number.

- Choice of 110 or 240 volt units.
- RCD protected at the source.
- 16 lockable compartments: small lockers 260 x 355 x 260mm, large lockers 475 x 355 x 260mm.
- Ventilated doors.
- Power cut-off when internal temperature reaches 60°C or more.
- Forced ventilation to keep air flowing through the unit.
- Thermostatic heater keeps the temperature at optimum levels.
- Isolator switch for power to the unit.
- The fire suppression and alert systems will still operate without mains power.
- Visual and audible alarm when there is a fire.
- Fire suppression system for responding to li-ion battery fires.
- GSM phone and text alert when there is a fire.
- Humidity sensor.
- Early warning detection.
- Universal communications port designed to integrate seamlessly into your site's fire control system. Compatible with: WES, ProLink, Cygnus systems and more.
- Size W x D x H: 1770 x 750 x 1820mm.
- Weight: 334kg.

VH16240	240	£11873.83

TOOL AND BATTERY CHARGING STORAGE UNIT

This walk-in charging enclosure integrates 32 individual 230V sockets arranged across five load-rated steel shelves to support simultaneous charging of multiple lithium-ion batteries and cordless power tools. The system operates from a single-phase 32A / 230V electrical input, optimised for balanced power distribution across all outlets. Each unit is factory-assembled and pre-wired, enabling rapid deployment with minimal on-site electrical work and ensuring full compliance with relevant UK electrical and safety standards.

- Equipped with a stand-alone automatic fire suppression system as standard. The system is thermally and smoke-activated.
- Integrated forklift pockets and crane lifting eyes allow the unit to be safely and efficiently repositioned as required. The unit can be isolated to reduce fire risk or positioned close to site offices for convenient monitoring and management.
- Built with security in mind. Its strong folded steel body and twin 5-lever deadlocks help keep your tools and batteries safe at all times - tough enough to deter thieves and built to last on any busy site.
