DH952S

REF	Overall size LxWxH mm	PRICE
DH951S	1500x700x1000	£793.47
DH952S	1500x700x1000	£623.91

## DRUM STORAGE PALLET SYSTEMS

The drum storage range gives a safe and secure system for storage and transportation of liquids. The sumps are designed to hold the contents of drum spillage. There is a wide range of drum storage options for storing either 2 or 4 drums. Fork guides combine to give a safe and secure lift when stacking or draining.

The two sump trolleys are mobile on 125mm rubber castors, 2 fixed, 2 swivel braked. Ref DH951S holds one drum horizontally. The drum cradle is fitted with four rollers which enables the drum to rotate. Ref DH952S holds two drums vertically. Fork centre 550mm.

## BUNDED FLOORING

Bunded flooring is designed to give protection in areas where hazardous liquids are used. The bund will contain any spills and they can then be dealt within an environmentally friendly way. The galvanised mesh grid panels are removable. Welds are liquid tight seams which are chemical and corrosion resistant. Special sizes and ramps can be supplied to order overall height 50mm.
