INSULATION JACKET

The insulation jacket can be used in conjunction with all the drum heaters in the range. When used with the side drum heaters, it can be fitted after heating to maintain the temperature for a longer period of time. With the base drum heater it can be fitted during heating to reduce warm-up time and increase the top range temperature attainable.

- Polyurethane nylon.
- Water resistant.
- Flame retardant.
- Needled poly insulation.
- Capacity: 200 litres.
- Non-standard sizes to order.

HIJD/200	£160.00

FLEXIBLE BAND HEATER

Construction is PTFE coated between layers of silicone coated glass fibre. Especially suitable for melting or reducing soaps, fats, oils or varnishes. A maximum of 3 units can be used per drum for quicker usage if required.

- Size: 1660 x 180mm.
- Double insulated.
- Silicone rubber insulation.
- 0°C - 120°C thermostat.
- High temperature tolerance.
- Simple spring catch release.
- 2m power cable.
- 1 or 1.5kw - 220-240v.
- Weight 1Kg.
