

FLEXIBLE TRAFFIC POSTS

Flexible posts are a lightweight cylinder used to guide traffic or providing warning of approaching hazards. Manufactured in HDPE material with retro-reflective sleeves, they are used on non-public roads, private property such as distribution depots, warehouses, car parks etc.

A special joint in the base ensures that they are self-righting after a collision. An integral bayonet connector fits into the optional base which can be bolted to the ground or fixed with a commercial adhesive.

- Use indoors and outdoors.
- Easily and quickly fixed into optional 60mm high black base.
- Highly visible day or night.
- Self-righting.
- 100mm diameter.
- Colour: red/white or black/yellow.

Self-righting when post is hit or distorted

RECYCLED BASE		
REF	Diameter mm	PRICE
291.11.145	270	£7.58

291.11.558	1000	red-white	£30.14
291.27.118		black-yellow	£30.14

FLEX BACK TRAFFIC POSTS

This Flex Back Traffic Post is a single piece guide post with an integrated base which anchors onto a suitable surface. Manufactured in a special thermo-plastic polyurethane (TPU), the posts can be driven over without causing damage, returning to their upright position, time and time again.

Moulded in signal red with reflective white bands for high visibility, they are used in areas such as car parks, distribution centres, forecourts etc.

- Easily installed.
- Highly visible.
- Self-righting.
- Long lasting.
- 80mm diameter.
- Base: 200mm diameter.
