

THE PALLET AND DOLLY IN ONE

The 'Pally' integrates the features of both a pallet and a dolly in one ingenious patented design. The 'Pally' is a half Euro sized (800 x 600mm) pallet and dolly combination. With one pedal push from either end, the 'Pally' with its load of up to 500Kg is transformed into a movable wheeled dolly unit and vice versa.

- No lifting equipment (fork lift or pallet truck) needed.
- Actionable from both ends.
- Size: 800 x 600mm. Capacity: 500Kg.
- Compatible with production lines, racking and mechanical handling equipment.
- Stackable when empty.
- Optional polypropylene load securing lid with retractable strapping system eliminates the need of stretch wrap or banding.

REF	Description	PRICE
PALLY	Pallet & dolly in one. 1 - 100 qty	£106.26
HELID	Load securing lid. 1 - 100 qty	£57.96
PALLY/LID	Pally & lid together. 1 - 100 qty	£153.18

PALDISK PALLET LOADER

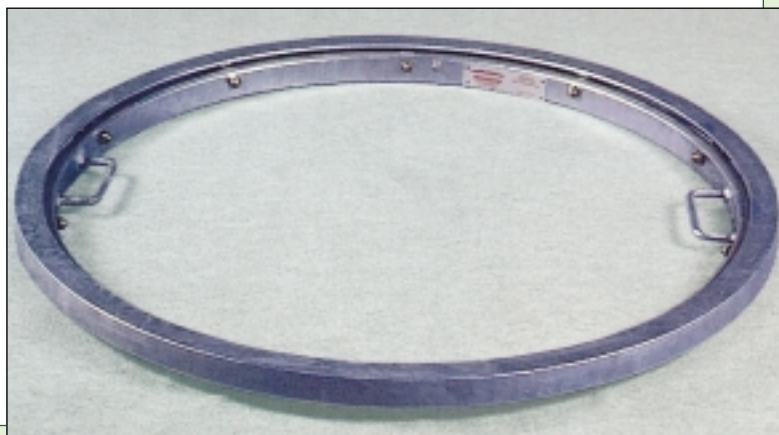

Paldisk is designed for a pallet truck to position a pallet on or off of the turntable. The load can easily be rotated by fingertip control thus eliminating the need to stretch. Less back stretch improves work efficiency and reduces the risk of injury. 360° rotation with access for a pallet truck by a built in shallow ramp. Ideal for use in restricted spaces, on mezzanine floors, narrow aisles, hygienic areas, food and pharmaceutical industries. Supplied with a fork truck lifting handle.

REF	Turntable O/H	Diameter	Weight	Capacity	PRICE
PALDISC	22mm	1100mm	100Kg	2000Kg	£959.00

PALRING PALLET LOADER

- Position a pallet on and off this ring by fork truck.
- Load goods onto pallets by hand without the risk of injury, much faster, by rotating pallet to operator.
- Maintenance free - very rugged.
- Easy to rotate even under full load by hand due to ball race bearings.
- Capacity 2000Kg. Weight only 26Kg.
- Ring height 60mm.
