

# vehicle mounted cranes

Lightweight demountable electric cranes for pick-ups, drop sides, flat beds and vans. Provides new load handling capabilities for the commercial vehicle and eliminates the need for manual handling. Ideal for applications in highways, construction, utilities or anywhere with general load handling requirements.

- Lifts up to 250/500Kg in all configurations of boom position.
- Remote control.
- Easily demountable.
- Low crane weight from 23Kg/44Kg (pillar is extra).
- Lightweight pillar available for vans.
- Above or below floor socket mounting for pick-ups.
- Overload protection.
- Compact design folds away when not in use.
- Easily installed at our own premises or by a vehicle body builder.
- 6m rope length as standard.
- Choice of 12V or 24V power from vehicle battery.
- Extensive range of options and accessories available.

REF	Capacity	PRICE
ML250	250Kg	£1884.40
ML500	500Kg	£2312.80

Compact, 500/1000Kg capacity electric cranes for pick-ups, drop sides and flat beds. Hydraulic slew version is standard on 1000Kg model and also available as extra on 500Kg model. Ideal for applications in highways, construction, utilities, railways, tyre industry or anywhere with general load handling requirements.

- Lifts 500/1000Kg in all configurations of boom position.
- Remote control.
- Overload protection.
- Compact design folds away when not in use.
- Low crane weight of approximately 73Kg/175Kg.
- Easily installed at our own premises or by a vehicle body builder.
- Choice of 12V or 24V power from vehicle battery.
- Extensive range of options and accessories available.

REF	Hydraulic slew	Capacity	PRICE
F500	No	500Kg	£2312.80
F500HS	Yes	500Kg	£2871.40
F1000	Yes	1000Kg	£3585.40

A range of three larger hydraulic cranes with 1150, 1500 and 2000Kg capacities combining value for money with market leading safety features - the load limiting device and load limit indicator and compact design. Ideal for applications in highways, construction, utilities, railways, tyre industry, builders' merchants or anywhere with general load handling requirements.

- Low crane weight of 175Kg/263Kg.

- Compact design maximising floor space.
- Integrated, fully enclosed oil tank and motor pump unit with easy access for servicing.
- Fully controlled hydraulic slewing.
- Two extensions with manual or hydraulic operation.
- Easily installed and easily demounted.
- Choice of 12V or 24V power from vehicle battery.
- Extensive range of options and accessories available.

REF	Reach @ Cap Kg	Capacity	PRICE
V12	2.9m @ 440	1150Kg	£5699.40
V15	1.5m @ 1500	1500Kg	£4985.40
V20	3.5m @ 770	2000Kg	£6378.40

The Tail Lift is ideal for loading pick-ups, off-road vehicles, Luton and box vans. It is lightweight and compact for loading utility, pick-up and 4x4 commercial vehicles, including Land Rovers, with items weighing up to 550Kg. Its unique design incorporates all the advantages of a cantilever platform lift but with no under slung columns, ropes or chains. This promotes reliability and eliminates the risk of components grounding out or getting bent underneath when fitted to off-road and low chassis vehicles such as pick-ups.

- Standard 500Kg MWL (550Kg as option).
- Hydraulically powered for smooth action.
- No underslung pillars.
- No ropes or chains.
- Cantilever action allows use of standard tow bar on vehicle.
- 12V operation from vehicle battery.
- Remote control (radio control as option).
- Overload protection.
- Compact design (bespoke platform sizes as option).
- Low weight of approximately 150Kg for minimal impact on vehicle payload.
- Steel platform (aluminium and stainless steel as options).
- Extensive range of options and accessories available.
- Easily installed by the manufacturer or your vehicle body builder.
