

ELECTRIC HIGH LIFTER WITH AUTO HEIGHT SENSOR

The GXN is equipped with an automatic levelling control. This device automatically adjusts the goods to the most ergonomic height. The levelling control operates both at lifting or lowering of goods. The initial position is of course adjustable, since it depends on the height of the operator. An adjustable operation delay is another function of the GXN which simplifies the handling of the goods.

- Choice of two capacities.
- Choice of two fork sizes.
- CE approved.
- Special fork sizes & wheel options available.

Load height sensor

REF	Cap Kg	Fork Width	PRICE
GXN1000520	1000	520mm	£2808.30
GXN1000685	1000	685mm	£3055.32

GXN1200685	1200	685mm	£3280.26

ERGO WORK POSITIONER/TILT LIFTER

Our best selling, ever popular ERGO range of work positioners is designed and built to exacting standards. Combining the features of a pallet truck and a stacker, the ERGO brings palletised work to the operator. The easily adjustable height eliminates back strain which, coupled to optional 90° or 180° tilting forks, makes for easy and comfortable parts picking and packing. A wealth of additional options allows the machine to be tailored to your exact requirements.

The ERGO 800 is available in 4 main models

- ERGO800M - 2 speed manual lift with fixed forks
- ERGO800MT - 2 speed manual lift with tilting forks
- ERGO800E - electric lift with fixed forks
- ERGO800ET - electric lift with tilting forks

ERGO 800 ET

ERGO 800 MT

Standard Specifications and Options

- All machines lift to 900mm with the option of 1200mm.
- Tilting machines tilt to 45° in either direction or can optionally tilt to 90° or 180°.
- All machines are 800Kg capacity with level forks (Derating to 500Kg at 45°).
- Manual models feature 2-speed lift pump.
- Electric models are operated by pendant remote control.
- Load is secured to the forks with nylon straps (supplied) or by optional, removable side support bars.
- Electric models supplied complete with battery and external charger, optionally, these machines are available with gel filled batteries and built-in charger.
- Standard fork dimensions are 545 x 1200mm, this size can be changed to an almost limitless range of sizes, also trucks can be supplied with straddle legs to suit all pallet types.
- Automatic load height control sensor available to keep the load at a regular height for ease of use.
